Special Dietary Needs

Over the years, we have accommodated many students with severe dietary allergens, intolerances, and restrictions due to medical conditions who live in residence and dine with us multiple times a day. Students who indicate that they require dietary accommodations when applying to this residence will have their circumstances reviewed by the Residence Life Office and be contacted by our Registered Dietitian if necessary. They will also be introduced to the culinary team who will support their needs throughout the school year. Students with anaphylactic allergies are asked to have their auto-injector on them at all times while dining in the residence Dining Hall in case of emergency. Residents with food allergies or intolerances and other dietary restrictions are responsible for communicating their needs when dining at our locations. Our staff will find the most accurate information and make an effort to accommodate such requests, and clearly communicate this information back to the customer. It is then up to the customer to decide whether to consume a particular item. The nutritional information for all menu items can be found online on our website. The University of Toronto has developed formal standards for Vegetarian, Vegan, Halal, and Local food. These can be found on the Food Services website https://www.ueat.utoronto.ca
